Ngo Quoc Dat

Fullstack Web Developer

(+84) 377 574 337 | ngodat200319@gmail.com | linkedin.com/in/dat-ngo | github.com/NgoDat2003 | ngodat-portfolio.vercel.app | Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Fullstack Web Developer with practical experience developing and deploying enterprise management portals, lease contract engines, and digitized retail operations platforms across **300+ F&B stores**. Proficient in TypeScript, Next.js (App Router), NestJS, PostgreSQL (Prisma/Drizzle ORM), and Monorepos (**Turborepo**). Strong expertise in integrating enterprise authentication (**Microsoft Entra ID / Azure AD SSO**), Contract-First API development (Orval / OpenAPI), retail data reconciliation, and automated workflow orchestration with **n8n**.

WORK EXPERIENCE

THINH THE VINH HOA GROUP **04/2026 - Present**
Fullstack Web Developer *Ho Chi Minh City*
*Leading multi-brand F&B retail corporation operating **300+ stores** nationwide (Maycha, Tam Hao, Thuc Coffee 24/7) integrated with enterprise SAP Business One ERP.*

- **Enterprise Operations Portal (Turborepo, Next.js 15, NestJS 10):** Engineered a centralized Web Portal streamlining system access and store operational dispatch across **300+ stores**; integrated **Microsoft Entra ID (Azure AD SSO)** via MSAL and cookie-based JWT authentication with Token Rotation & Replay Detection.
- **Store Lease Management Platform (Next.js 15, NestJS, Prisma, PostgreSQL):** Digitized lease contract management for **100+ store properties**, replacing fragmented Excel sheets; designed an Addendum calculation module featuring **Dry-run financial simulation** and **Period-locking** mechanisms, ensuring financial data integrity during SAP B1 accounting imports.
- **Brand Web & CMS In-housing (React 19, Express, Drizzle ORM, PostgreSQL):** Led the technical in-housing and restructuring of the brand website and admin CMS to optimize operational costs; developed a 24/7 store locator module and executed complete **Data Migration** from the legacy platform to the new database with high data integrity.
- **Automated Sales Data Monitoring (iPOS → Intermediate DB → SAP B1):** Monitored automated sales synchronization pipelines from retail POS into SAP B1 via intermediate database; built automated verification workflows with **n8n** to detect sync errors per store and dispatch real-time alerts to the Accounting department.

TADALABS **06/2025 - 03/2026**
Frontend Developer *Ho Chi Minh City*
Technology company delivering omnichannel retail software and Inno POS Enterprise ecosystem.

- **Omnichannel POS & Inventory Modules (React, TypeScript, Vite):** Developed core enterprise POS modules including Sales Order, Inventory Management, Fast Delivery, and multi-branch Return/Repair processing.
- **Cashier Transaction State Management (Zustand Slice Pattern):** Designed multi-tab cashier transaction state management; implemented modular checkout supporting split bills and concurrent payment gateways (Cash, POS Card, Dynamic QR Code), reducing checkout bottlenecks during peak hours.
- **Retail Catalog Performance Optimization:** Applied **TanStack Query caching** and **Virtualized Lists** to render large product catalogs, maintaining smooth and responsive UI during cashier searches and item selection.
- **Form Validation & Automated E2E Testing:** Built business form systems with **React Hook Form + Zod**; authored automated test suites with **Playwright E2E** simulating core cashier order-to-checkout flows to mitigate release regression risks.

EDUCATION

B.S. in Software Engineering — *Industrial University of Ho Chi Minh City (IUH)* **2021 - 2025**
GPA: 3.53 / 4.00 (Distinction / Top Honor) | English: Proficient technical reading and professional communication

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5/CSS3, SQL

Frontend: React.js (18/19), Next.js (App Router), TanStack Query, Zustand, React Hook Form, Zod, Tailwind CSS, Radix UI, Ant Design, MSAL, Orval

Backend: NestJS 10, Node.js, Express.js, RESTful APIs, Microsoft Entra ID (Azure AD SSO), JWT, Argon2, RBAC, Cron Jobs

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM, Drizzle ORM

Testing & DevOps: Playwright E2E, n8n Automation, Docker (basics), CI/CD, Postman, Git/GitHub, Vite, Turborepo
