PROFESSIONAL SUMMARY

Junior Frontend Developer with experience building POS and QA/QC systems using React.js, TypeScript, Next.js, TanStack Query and RESTful APIs. Strong in dashboards, dynamic forms, data tables, API integration and automated workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, TanStack Query, Zustand, Redux Toolkit, React Hook Form, Zod, Tailwind CSS
Backend: Next.js API Routes, RESTful APIs, Prisma ORM, PostgreSQL, SQLite, JWT, RBAC
Testing/Tools: Playwright E2E, Vitest, Git, GitHub, Docker, Postman, n8n, SQL Server
Domain: POS workflows, QA/QC audit workflows, UAT, API integration | English: TOEIC 475

WORK EXPERIENCE

Thinh The Vinh Hoa - Maycha — 4/2026 - 6/2026

IT Application / Business Analyst

- Supported QA/QC requirement standardization for 200+ Maycha, Tam Hao and franchise stores by analyzing checklist documents, scoring rules, audit planning, QC execution, evidence upload and Action Plan workflows.
- Contributed to an outsourced full-stack Next.js QA/QC system by clarifying audit business rules, preparing UAT scenarios for QAM/QC/SM/AM roles and implementing selected UI screens, API routes and validation logic.
- Wrote SQL queries to investigate daily POS/SAP sync issues, helping classify errors by group status, AR/GI/JE messages and sync severity.
- Developed a lightweight internal n8n workflow to automate daily POS/SAP monitoring, using existing SQL checks and report forms to detect recurring sync issues and notify the IT team.

TADALABS | Frontend Developer — 6/2025 - 3/2026

Project: Inno POS Enterprise - Omni-channel Point of Sale System

- Developed 4 POS modules including Sales, Inventory, Shipping and Repair Order using React.js and TypeScript, supporting retail workflows from order creation to stock, delivery and repair tracking.
- Built reusable dynamic form components with React Hook Form and Zod, accelerating form development across multiple POS features and improving validation consistency.
- Improved data-heavy UI performance with TanStack Query caching and optimized API request handling, reducing repeated requests and improving user responsiveness.
- Developed Playwright automated tests for critical POS flows, covering login, sales order, checkout and regression scenarios to reduce manual testing effort.

PERSONAL PROJECT

QualityOps QA/QC Platform - Full-stack QA/QC Audit Management System — 5/2026 - Present

Live Demo: https://qaqc-fe.vercel.app/ | FE: https://github.com/NgoDat2003/qaqc_fe | BE: https://github.com/NgoDat2003/qaqc_be

- Built a full-stack QA/QC audit system with role-based modules for QAM, QC, SM, AM and Admin.
- Implemented audit planning, checklist configuration, QC submission, evidence upload, scoring logic, RBAC and Action Plan lifecycle.
- Validated critical flows with Vitest and Playwright E2E, covering login, audit submission, evidence upload and lifecycle completion.

EDUCATION

Industrial University of Ho Chi Minh City — 2021 - 2025

Information Technology / Software Engineering | GPA: 3.53/4.00
